1. The bridge being built at the shipyard is a loading bridge. The bridges in construction at Wismar and Stralsund are also loading bridges with a length of 70 m. The bridges are equipped with couplings for railroad cars. The date for their delivery to the Red Army is 10 January 1952 and in February the construction of another of these bridges is to be begun. If the delivery date is not met, there will be a penalty of 150,000 DM.
2. Drifters [redacted] have been launched. They are different from the preceding ships in that the after superstructure reaches right to the stern.
3. The icebreaker "Popovich" has been turned over to the Soviets and is ready to leave. The new seagoing tug ran her trials before Christmas. A 2000 T. Soviet tanker is in for repairs. The keel sections for the 3000 T. ship are ready. Three 400 HP Buckau-Wolf motors have arrived for drifters. The M boats are still at the yard, and will stay for sometime, as their decks are being replaced.
